

STATE BOARD OF LICENSURE FOR PROFESSIONAL ENGINEERS

(For Board Use)

RCVD _____

PE # _____

RETIRED STATUS APPLICATION

I, _____, a licensed professional engineer in the State of Maine, wish to retire from the active practice of professional engineering, and ask that I be placed on retired status with the Board.

I understand that by retiring from the active practice of professional engineering I am no longer entitled to practice professional engineering in the State of Maine.

I understand that I may keep my professional engineer seal as a memento of my years of practice, but that I may not use said seal or allow anyone else to use said seal in any manner that would indicate the active practice of professional engineering.

I understand that if I later desire to return to the practice of professional engineering, I may be required to meet all of the current statutory requirements for qualification as a professional engineer, including the completion of required education, which could include professional development courses or college-level engineering coursework up to and including an approved four-year course of engineering studies, sitting for the Fundamentals of Engineering and/or the Principles and Practices of Engineering examination, providing a work history and references, and any other requirement then existing in statute.

I understand that I am required to pay a fee each biennium to maintain the retired status.

The application of my signature and seal below indicates that I have read and understand the conditions listed above and that I agree to them.
